REMEDY SCOTLAND PETITION

We the undersigned request that the Scottish Executive and governments action the following:

1. **Acknowledge** that a significant number of doctors working in Scotland are to lose to their jobs in October. This will potentially affect patient care.
2. **Support** Scottish domiciled doctors disadvantaged by an unfair job application and selection system.
3. **Guarantee** that no junior doctor currently working in NHS Scotland will be unemployed as a result of the current crisis.
4. To **commit** to a fair and transparent job interview system for applications to Scotland.
5. To **increase** the number of long term training posts in Scotland, therefore benefiting future patients and doctors and generally improving morale within the NHS.
